

Guidance unit (FaFü)

The thread guide axle was designed according to the requirements of the textile industry. It makes an accurate rolling possible of a thread up on a coil. Core elements are here a linear rail guidance in combination with a very exact rotation transducer. The axle was designed very maintenance-poor and makes a simple central lubrication possible.

Technical data:

- Proceed speed 0,25 m/sec.

Generally

	without flange
Length	936 mm driven out 559 mm brought in
Width	100 mm
Height	97 mm
Weight	32 kg

Order remarks

30379	Thread guidance axle
