

Heating cartridges-Elevating truck platform (PHUWA)

The **elevating truck platform** is used for the safe mounting/dismounting from wafer furnace cartridges.

The cartridges are up to 1.90 meters long and weigh maximally 230 kg (8inch cartridge).

The **elevating truck platform** is optimized for the most usual heating cartridges and is characterised by extremely small basic dimensions.

The unloading unit is around 90 degrees tiltable for a around safe and simple handling of the wafer cartridges during transport to be guaranteed.

Picture with stroke fork and supporting element

Picture with Width-adjustable stroke fork 250 + 450mm discharge

Picture with Width-adjustable supporting elements - fast mountable for loading/unloading

Electrical connection data

Supply voltage	110 – 240 V
Capacity maximally	500 Watt
Frequency	50/60 Hz
Safety class system	I
Connecting cable	3 x 1mm ² >= 5m long
Connection	Cold device plug 3-pin

Generally

Width	900 mm
Height	2.060 mm
Depth	555 mm (without stroke fork and supporting element)
Gewicht	

Order remarks

26308	elevating truck platform
-------	--------------------------

minimum procedure height	540 mm
max. procedure height (over supporting element expandable)	1.790 mm
