

POLOS 600 / POLOS 1000

The Polos 600 und 1000-Serie extend the spinner series by centrifuges for disks up to 1,000 mm in diameter. Here the process area and substantial housing components are manufactured of high-grade steel. A fully automatic cover opening and cover locking with protection circuit provide for short process tracing. Automatic dispensation and positioning mechanisms are optionally available. Electrical entrances and exits offer the integration of neighbouring processes. Workpiece carriers made of high-grade steel, coated aluminum or special plastics with vacuum and mechanical centring are to be seen from the standard program or are user-specific developed.

Anschlussdaten

Supply voltage	200 – 240 VAC (50/60 Hz)
Capacity maximally	1500 W
Vacuum	- 80 kPa (-24 inchHg)
Vacuum Hose connector	ID 6, AD 8
CDA	2 - 5 l/min
CDA Hose connector	ID 4, AD 6
Compressed air supply	6 – 8 bar
Expiration	1" M-NPT threaded connection
